

Imagine brings a  
proven methodology,  
best practices  
approach, and skilled  
implementation  
consultants providing  
the expertise and  
support needed  
for your success.

**Imagine Solutions**, founded in 1998, provides innovative, cost-effective solutions that derive value from advances in digital imaging and content management. Imagine Solutions offers products and solutions to enhance your Enterprise Content Management platform from strategy development, business process solutions, and conversion services to development of off-the shelf technology solutions.

Imagine Solutions is an ECM leader within top financial institutions and government services organizations. We have a strong track record of providing measurable and quantifiable results, mitigating compliance risk, and increasing operational effectiveness for our clients.

### Software

A core component in your enterprise infrastructure is the ability to manage how content enters your organization. Encapture® is an easy to use content acquisition management layer that enables organizations to support central, distributed, and remote (beyond your company's firewall) capture and it can dramatically reduce the paper handling burdens you face today. Our customers see reduced costs and error rates, accelerated business processes, enhanced customer satisfaction, and improved compliance performance.

### ECM Strategy

Clients benefit from a practical approach to ECM strategy consulting that delivers actionable plans with a clear path to business value.

Typical engagements are customized and developed specifically for the organization and may include:

- Strategy Development
- Business Process Improvement Assessments
- Enterprise Platform Assessments

Organizations that are still largely paper-based are ripe for fast ECM value if they choose the right first steps which can often fund the greater ECM strategy. Imagine Solutions has the experience to recognize the top opportunities and make ECM truly transformational.

## Solutions and Services

ECM platforms can be complex and mission critical, with the need to continually evolve as the technologies and your business requirements do. Imagine brings a proven methodology, best practices approach, and skilled implementation consultants to each situation providing the expertise and support needed for your success. We deliver and support projects that build a strong ECM and workflow backbone within our client organizations. Solutions and Services include:

- End-to-End ECM business solution development
- Platform Implementation
- System Integration
- Custom Application Development
- Remote Administration and Monitoring
- Client Managed Services
- Health Checks
- Conversions
