

IBM Datacap 9.0 Upgrade Service

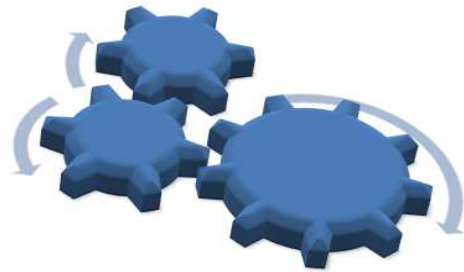

IBM Datacap 9.0 is a ground-breaking new release of IBM's enterprise capture software. With the breadth of new capabilities and dramatic improvements around ease-of-use, we believe current Datacap customers will be very motivated to upgrade to this release as soon as possible. That's where Imagine Solutions comes in. With years of ECM and Datacap experience Imagine Solutions is the partner to get you up and running on Datacap 9.0 and realizing the business benefits that this exciting new release has to offer.

The Datacap 9.0 Upgrade Service Includes:

- Assess current Datacap Environment
- Upgrade Datacap components to Version 9 for development and test environments
- Roll out upgraded solution to production and DR environments (or oversee customer led roll-out)
- Determine which custom actions can be replaced with version 9 out-of-the-box (OOTB) actions
- Upgrade custom actions to OOTB actions as appropriate
- Recompile and regression test current custom actions that are not being replaced with OOTB actions
- Generate new custom actions as needed
- Model complete conversion from current release to Datacap 9.0
- Provide professional project management throughout
- Create complete document describing new environment
- Train and hand-off to customer

Why Choose Imagine Solutions?

- IBM ECM Partner of the year award winner- multiple times
- Deep Datacap expertise – years of experience deploying Datacap solutions
- Numerous Datacap solution accelerators – to speed up deployments
- Superior skills across the entire ECM spectrum
- Our focus is on delivering a total business solution

Pricing is based on scope of current Datacap environment deployed and number of custom actions in use and will be formally priced in a Statement-of-Work (SOW).
