

Capture Content Earlier And Easier.

AN ENTERPRISE DISTRIBUTED CAPTURE SOLUTION
FROM **IMAGINE SOLUTIONS**

Drastically And Rapidly Reduce Costs Associated With Cumbersome, Document-Based Business Applications And Easily Transform Operations with Encapture.

Capture is where Enterprise Content Management (ECM) begins. The sooner, more safely, and more accurately content enters your ECM ecosystem, the better everything downstream will flow.

Imagine Solutions' Encapture was built from the ground up to be the single point of content capture for your enterprise. It is simple, intuitive, secure, and scalable, and it allows thousands of capture stations to be managed through a central point of administration.

Whether you have 20 or 20,000 locations, Encapture securely acquires content from anywhere inside or outside the organization, in a consistent and uniform way, and

easily transfers it to your imaging workflow or archiving system.

Encapture customers typically realize a Return-on-Investment (ROI) within the first 12 months, some much sooner.

"It's hard to think of an easier way to eliminate millions of dollars of expense with so little disruption – one of the smoothest implementations I've managed. Now that we have the documents captured we can focus on process improvements with ECM."

*CLIENT SVP, CENTRAL OPERATIONS,
A LARGE U.S. BANK*

The Complete Enterprise Capture Platform.

TRANSFORMATIVE

Enhances business processes by guiding users, seamlessly integrating capture into business applications while eliminating the risk of inaccurate document separation and indexing with database lookups.

COMPREHENSIVE

Maintains strict quality and security guidelines supporting a variety of authentication methodologies, data encryption, tamper-proof batches, and sophisticated group and user role definitions. Supports a wide diversity of devices from any TWAIN supported desktop scanner to most major multi-function devices. Supports many different client types from networked multifunction peripherals, to browser based capture, to Microsoft Office integration and more.

STRAIGHTFORWARD

Improves operational efficiency by reducing deployment and upgrade expenses with centralized administration. Real time batch monitoring allows you to maintain visibility into batch processing workflow.

Functionality designed to drive document capture at the first point of touch.

HIGHLY SECURE –

from the moment Encapture® acquires content, that content is encrypted – both in flight and at rest – and maintained as tamper proof.

USER FRIENDLY –

making complex capture processes simple for your users. Encapture® provides a guided user experience and can be easily deployed in virtually any use case.

BROADLY EXTENSIBLE –

extensive process management through configurations and extensions enable tailoring of the capture flow.

SEAMLESS INTEGRATION –

captures and indexes content and data at the first point of touch through the most comprehensive set of capture points directly driven by your business applications.

SCALABLE –

Encapture grows with your business.

Enable capture from a wide range of contexts, all from a cohesive, user-friendly platform.

DISTRIBUTED WEB CAPTURE

The Web Client is a feature-rich end user function in Encapture, providing full document capture capabilities within a Web browser and the ability to monitor in-process content.

MULTIFUNCTION PERIPHERAL

Encapture for Multifunction Peripheral support provides the ability to capture paper documents at shared, networked imaging devices from the leading MFP manufacturers. It is fully integrated into the device front panel, displaying a simple, easy to follow interface that guides the end user through the process.

APPLICATION INTEGRATION

The Application Integration Wizard provides out-of-the-box integration with Microsoft Office and the Windows File System providing the ability to capture electronic content directly from the application from which the content is received or created. It is launched directly from an end user's line-of-business

application, such as a POS system, CRM, or electronic forms solution.

PRINT DRIVERS

The Encapture Print Driver uses a print driver interface to allow content to be sent to Encapture from any application with the ability to print, including Web browsers, Adobe PDF viewers, content authoring tools, and electronic forms solutions.

DOCUMENT REQUESTS

The Document Request Wizard is a unique function that allows the capture process to be a participant in the workflow process, such as an email or Website to support document capture inside and outside the corporate firewall.

MOBILE DEVICES

The Encapture Mobile client provides the ability to capture paper documents by using the camera on mobile devices. Content can be classified, indexed and optimized, all from the palm of your hand.

UNATTENDED BATCH CAPTURE

Encapture's Discovery Service polls source locations for content and automatically initiates the capture process from external systems like FAX and email servers.

Encapture provides a single, powerful path for every kind of content entering your enterprise.

paper documents, emails, electronic documents, faxes, electronic images, audio files & videos

“Encapture has been a strategic success for us, not just an operational improvement.

It lets our advisors focus on the customer and helps us to retain our most valuable advisors.

The operational benefits of cost savings and compliance just enrich the ROI for us.”

IT BUSINESS LIAISON, LEADING FINANCIAL PLANNING PROVIDER

request

Transactions need content. If it's missing, Encapture lets you know.

capture

Capture content right away from any device. Anywhere.

index

Document Type

Encapture assigns metadata to content for easy retrieval.

deliver

SEND

Content is delivered to any system or workflow. It's simple, intuitive, secure and scalable.
